
MEASUREMENT GUIDE

Artisans of Scotland

We've put together this guide to help you measure correctly for your Highland wear.

To avoid any incorrect measurements, please get someone to help with you take the measurements.

A

Sleeve Length

Measure from shoulder seam to desired length at cuff. Ideally half an inch of the cuff should be visible.

B

Chest Measurement

Measure loosely around chest at under arm height while wearing a shirt/vest (no jacket), with arm by the sides. Do not inflate the chest.

C

Waist Measurement

Measure around the waist at navel height. Take measurement firmly, so that kilt may sit comfortably without falling down. Do not breathe in or hold stomach in.

D

Seat Measurement

Measure around the fullest part of the seat/hips, place three fingers inside the tape to avoid getting this measurement too tight.

E

Kilt Length

The helper should measure from your navel to half way across your knee cap. Stand upright, looking straight ahead with feet together.

F

Height

We require your overall height to check measurements appear correct. Please give your full height from head to foot without shoes on.

If you have any questions about the measurement process please don't hesitate to get in touch.
